

Professional One Hand Edge Clamp™

ISO 9001 CERTIFIED

It's All About the Quality.

Tightens and secures with a simple twist of the handle!

The Bessey Professional One Hand Edge Clamp was developed with the production and custom woodworker in mind. It features a compound screw mechanism, which allows the operator to simultaneously engage the top and bottom pressure pads while applying pressure to the front edge of a countertop.

All three pressure surfaces are advanced with the turn of a single handle. The cushioned pads firmly grip without slipping or damaging the work surface. This clamp has a maximum clamping pressure of 500 lbs. and can accommodate countertop thickness of up to 2 1/8". It can be used to apply edges to countertops, tables, shelves or in any operation where three-way pressure is required. The Bessey Professional One Hand Edge Clamp works beautifully when applying straight edged countertops, and really performs when bending solid wood edging into curves.

No other edge clamp on the market features truly single-handed operation or performs as well as the Bessey EKT-55, Professional One Hand Edge Clamp.

LIGHTWEIGHT, ALUMINUM FRAME
... optimized for high static stress loads. Micro-coated surface prevents corrosion and discoloration

ERGONOMICALLY SHAPED HANDLE
... designed for one-handed use, provides secure grip – made of impact resistant plastic

EXTENDIBLE PRESSURE PLATE
... reaches out a full 1 3/4".

UNIQUE DUAL SPINDLE FUNCTION
... outer spindle acts on the clamping jaw – inner spindle applies pressure to the edge

LARGE JAWS
... with integral, soft plastic caps for gentle, non-slip clamping

SWIVEL MOUNTED, COLD EXTRUDED PRESSURE PLATE ... perfectly flat and electro-galvanized. Large removable plastic cap for gentle, secure clamping

LARGE OPENING
... for clamping up to 2 1/8"

PIVOTING SUPPORTS
... reinforce clamping pressure exerted by jaws

CATALOG NUMBER	NOMINAL THROAT	NOMINAL OPENING
