

# Magnesium jaw, glass-fiber reinforced, polyamid lever and world famous Bessey steel rail ... a new generation in clamping!

The KliKlamp's ratchet action resists vibration ... the perfect clamp around power tools!

Quick clamping, quick release ... on virtually any shape.

From a "light-as-a-feather" touch, to the grip of an eagle's talon ... always the right pressure – up to 330 lbs.

CAT. No	NOMINAL THROAT DEPTH	NOMINAL JAW OPENING	NOMINAL PRESSURE
KLI3.004	3"	4"	330 LBS
KLI3.008	3"	8"	330 LBS
KLI3.012	3"	12"	330 LBS

## Bessey LM™ General Purpose Clamps

The Bessey LM clamps are built to handle the majority of lighter duty clamping tasks economically (for picture frames, model makers, musical instrument builders, hobbyists as well as the professional woodworker). They are still packed with the features that you expect in a Bessey clamp: quality cast jaws; bright drawn steel rail serrated on two sides; ergonomic grip wood handle; large Acme thread and protective non-marring cap. A broad range of sizes are available, giving the choice of the right clamp for the job.
