## Testimonials

Just once in while a concept comes into the arena that revolutionizes the craft. Dani's Fabrication Clamping System is such an idea. His system breaks the fabrication time barriers and brings ease of use and creative solutions to the fabrication workspace. Join the revolution. This idea is the quickest way to enhance you profit margins.

Dani Designs:

Just want to send you a quick congratulations and thank you on your clamps.

We just got them at the beginning of this week and I wish I had ordered them a year ago. Part of what makes their design so excellent is their simplicity.

Any doubts I had were gone in the first hour (I got off to a rough start - during the first five minutes, and EM4 clamp slipped and bit my finger).

I wish you continued success.

Thank you,  
Marc Ailor
