

GraniteFX™

GraniteFX, an attractive line of textured silicone for cultured granite, solid surface, engineered, and natural stone applications, offering a versatile and affordable solution for creating smooth transitions in tub/shower surrounds and between back/side splashes and cultured granite counter tops. One standard GraniteFX color (standard colors shown below) matches several different manufacturers' brands of cultured granite. Custom colors are quickly created with minimum requirements.

Easy-to-use, GraniteFX allows a hassle-free application, requiring no special tools or application methods or mixing. Simply apply as a typical solid silicone product—resulting in exceptional granite effects.

GraniteFX™

Features

- 100% neutral cure silicone with Poly Chips® granules
- Mildew resistant
- Seals out water
- 10 fluid ounce tube covers 25 linear feet at 1/4" x 1/4" bead size
- Uses standard caulk gun for dispensing
- Excellent UV resistance—10,000 hours QUV tested
- 350% elongation
- Tack free in 20 minutes
- Full cure in less than 24 hours
- 12 month shelf life** at standard room temperatures

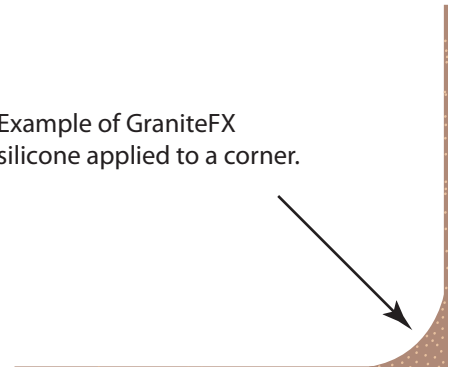

Benefits

- No shrinking
- No minimum order requirements on standard color line
- Custom colors available with three week lead time and a batch-yield (appr. 48 tubes) per custom color
- GraniteFX tube comes with a cap to seal tip and extend product life-time after tube is opened

Application

- Surface area should be free of debris and completely dry
- Using easily removable tape—such as masking tape—tape-off the area to be sealed with GraniteFX
- Insert GraniteFX tube in standard caulk cartridge
- Cut nozzle at desired opening size
- After applying silicone bead, smooth with caulking tool or finger
- Remove tape
- Silicone will fully cure within 24 hours

Example of GraniteFX silicone applied to a corner.

*Minimum order requirements for custom colors.

**12 months on sealed (unused) tubes.
